

**Powerful rechargeable headlamp**

**HL2000**

 **FLACARP**

**Technical information:**

Dimensions: 58 x 39 x 29 mm

Weight: 87 g

Luminous intensity: 200 lm

Battery: LiPol 2000 mAh

Functions: 5 modes + long lighting mode

Waterproof: IPX4

Charging time: 4-5h

Charging connector: USB-C

Adjustable Angle: 40°

**Package Contents:**

Headlamp

USB cable

Instructions

**Control:**

**White light** - by pressing the button above the white LED can be white light controlled in 3 steps (high, medium and low brightness). Longer press to turn off.

**Green light** - by pressing the button above the green LED can be green light controlled in 2 steps (high and low brightness). Longer press to switch off.

**Long lighting mode for fishing place marking** - double-click button above the white LED to activate the long lighting mode (reduced brightness with maximum endurance). Another press of any button will light the headlamp again in normal mode with the color controlled by that button.

**Turning the headlamp off** - long press any button for 2 sec. to turn the headlamp off, no matter what light mode is on.

**Battery status** - there are 3 green battery status indicator LEDs near the USB charging connector:

**3 LEDs lit:** more than 70%

**2 LEDs lit:** 70 - 30%

**1 LED lit:** less than 30%

**1 LED flashing** - almost discharged

**Note: in order to minimize battery consumption, the status LEDs are deactivated in long lighting mode.**

**Charging the headlamp:**

The charging connector is located at the bottom under the rubber cap. Charging is indicated by a flashing green LED, once all 3 are lit = 100% charged. We recommend fully charging the headlamp before first use.

Protect your eyes from looking directly into the LED. Do not leave the flashlight on during the summer months in the car on the dashboard or behind windows in direct sunlight. Do not throw the flashlight into a fire.

The importer declares that the device has been issued with an EU Declaration of Conformity. Do not dispose of unusable electrical product in mixed municipal waste, it must be disposed of environmentally in accordance with EU Directive 2012/19. The product is warranted for 24 months, the lifetime of the built-in LiPol battery depends on the number of charging cycles and usage. The warranty does not cover mechanical damage and defects caused by use contrary to these instructions. Please refer to the importer's website for extended information on product warranty and battery life.
